The **M.A.P. Sales Training Material Ordering System** (**STMOS**) was designed and developed to streamline the Sales Training process for Product Trainers and Managers. It facilitates the distribution of training materials to Sales Reps and provides Trainers with the means to ensure that your materials are *current, complete and compliant*.

The **M.A.P. STMOS** is a web based system that can be accessed from multiple platforms. Product Trainers and Managers login to the portal with their unique username and password using their internet enabled device. The **STMOS** also has the ability to restrict access to certain brands/field forces depending on the user.

Kits can be created and edited to add, remove or revise items as needed, providing Product Trainers with the ability to truly customize the materials to suit *all* of their training needs. The built-in employee roster facilitates order placement, shipping, and prompt delivery!

The **STMOS** is designed to completely monitor your site activity. **Order Search** and **Tracking** features allow the user to easily and quickly identify: who placed the order, what items have been ordered, and when was it delivered. Our **Reports** page provides the information you need to create the customized, actionable reports that answer your *specific* needs!

Key Benefits:

- Intuitive & Responsive
- Supports Sales & Product Training
- Inventory Management
- Access from Multiple Platforms

- Efficient & Compliant
- Timely Notification Capabilities
- Order History/Tracking Information
- Customized, Actionable Reports
